DETAILED ACTION

1. This office action is in response to an amendment filed January 31, 2005. Claims 28, 29, 33 and 36-40 were previously pending. Applicants did not amend any of the claims.

Terminal Disclaimer

2. The terminal disclaimer filed on January 31, 2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,709,813 has been reviewed and is accepted. The terminal disclaimer has been recorded.

3. Applicant's filing of the terminal disclaimer rendered moot the rejection of claims 28, 29, 33 and 36-40 under obviousness-type double patenting over claims 18 and 19 U.S. Patent No. 6,709,813.

Allowable Subject Matter

4. The following is an examiner's statement of reasons for allowance: no references have been found teaching or suggesting claims 28, 29, 33 and 36-40. The closest prior art reference, Picone et al. (WO 92/11273), teaches amplification of target nucleic acids with two sets of primers and eight probes, but the primer melting temperatures do not fall within the ranges claimed in claims 33, 36, 37 and 40.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
